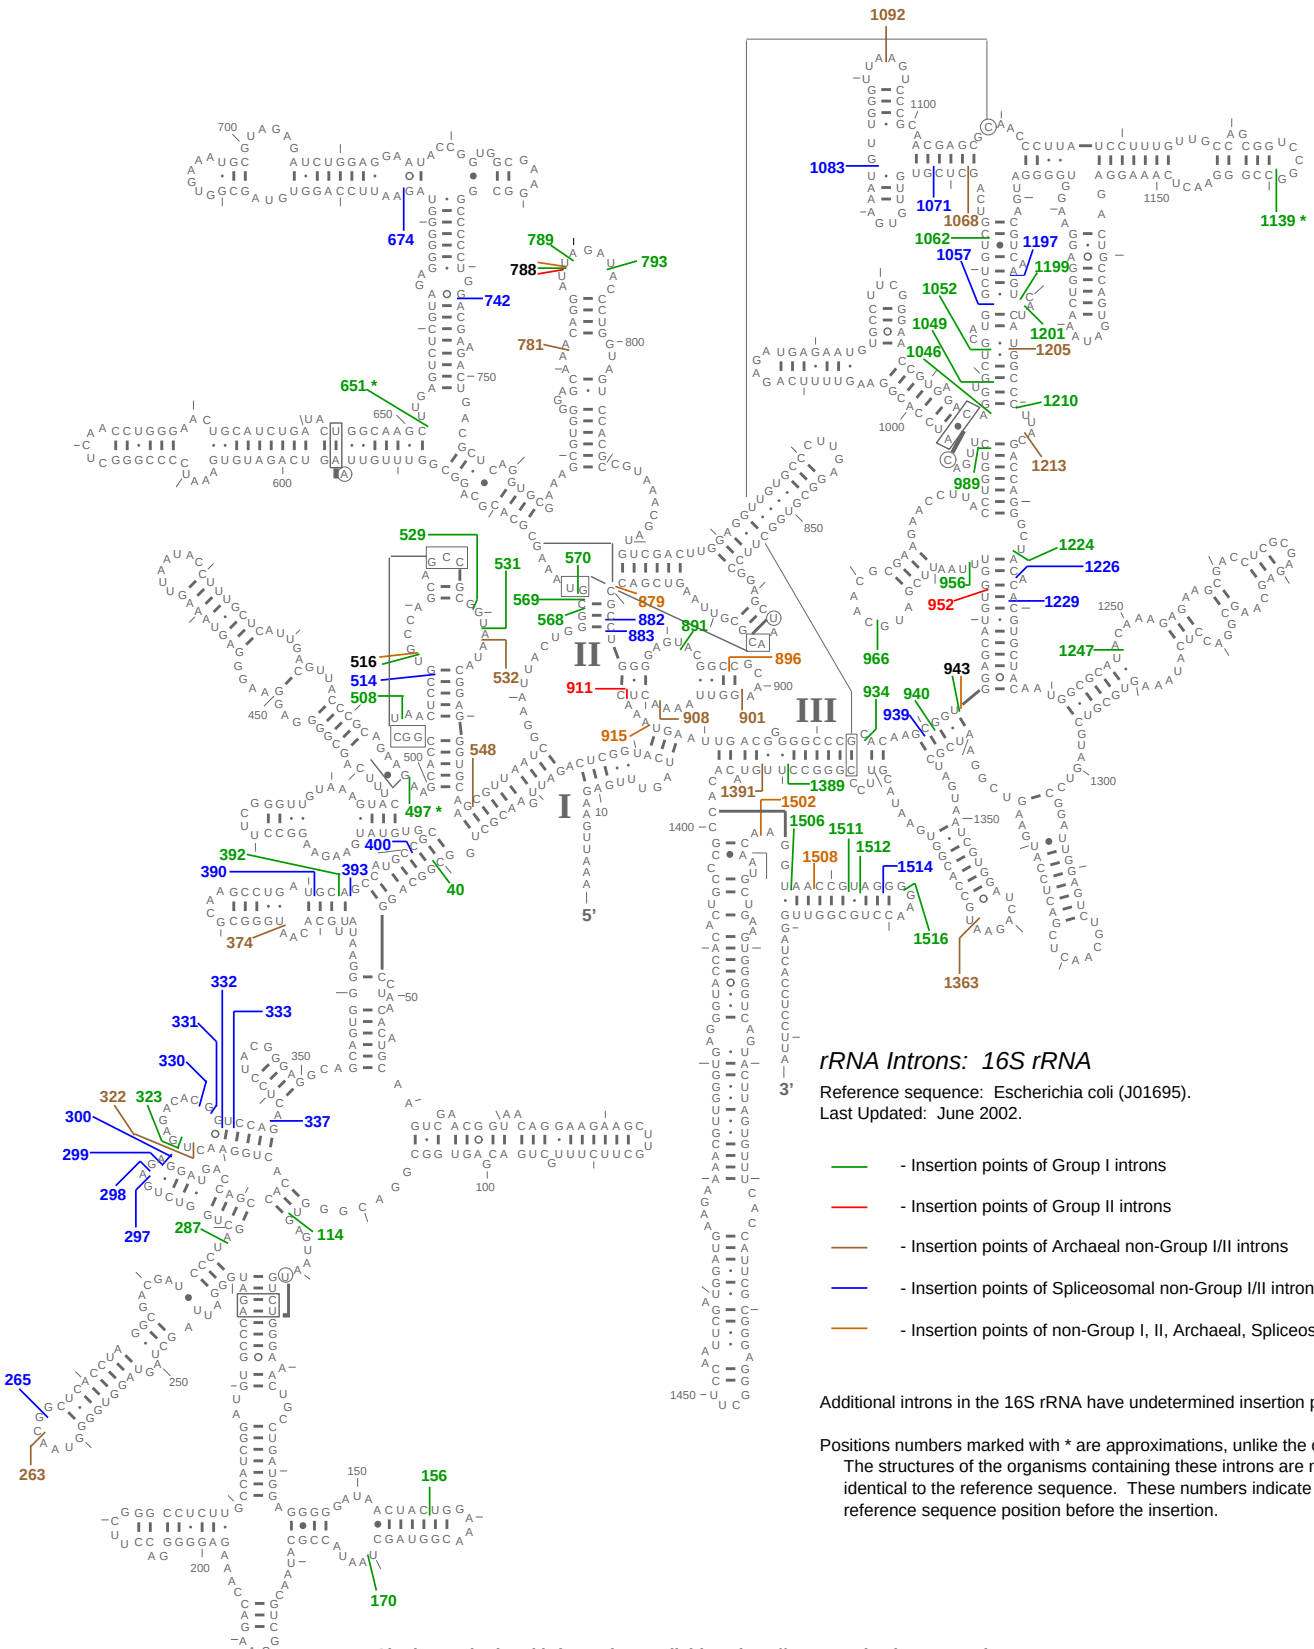
rRNA Introns: Intron Positions in 16S rRNA



rRNA Introns: 16S rRNA

Reference sequence: Escherichia coli (J01695).
Last Updated: June 2002.

- Insertion points of Group I introns
- Insertion points of Group II introns
- Insertion points of Archaeal non-Group I/II introns
- Insertion points of Spliceosomal non-Group I/II introns
- Insertion points of non-Group I, II, Archaeal, Spliceosomal introns

Additional introns in the 16S rRNA have undetermined insertion points.

Positions numbers marked with * are approximations, unlike the others. The structures of the organisms containing these introns are not identical to the reference sequence. These numbers indicate the reference sequence position before the insertion.
