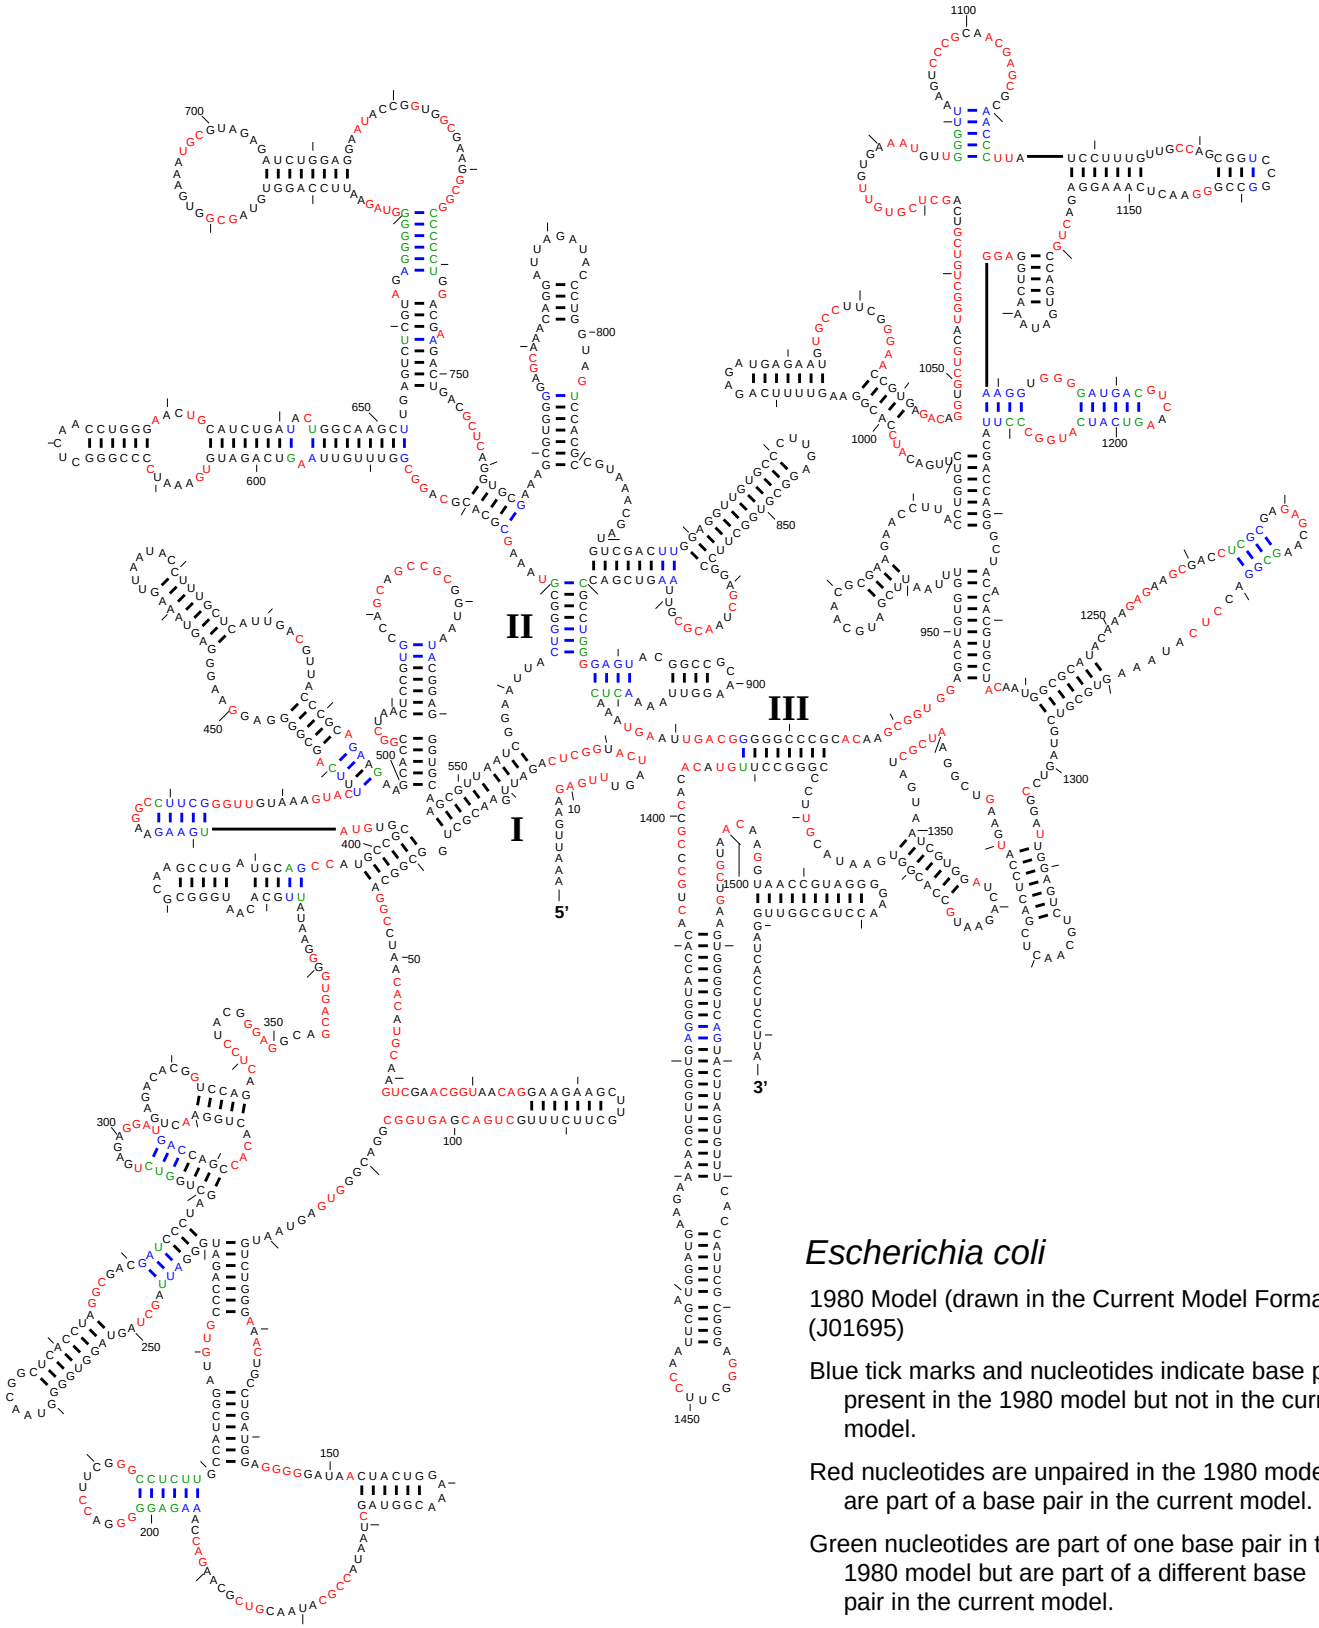
Secondary Structure: small subunit ribosomal RNA



Escherichia coli

1980 Model (drawn in the Current Model Format) (J01695)

Blue tick marks and nucleotides indicate base pairs present in the 1980 model but not in the current model.

Red nucleotides are unpaired in the 1980 model but are part of a base pair in the current model.

Green nucleotides are part of one base pair in the 1980 model but are part of a different base pair in the current model.

Diagram Version: March 2002.
