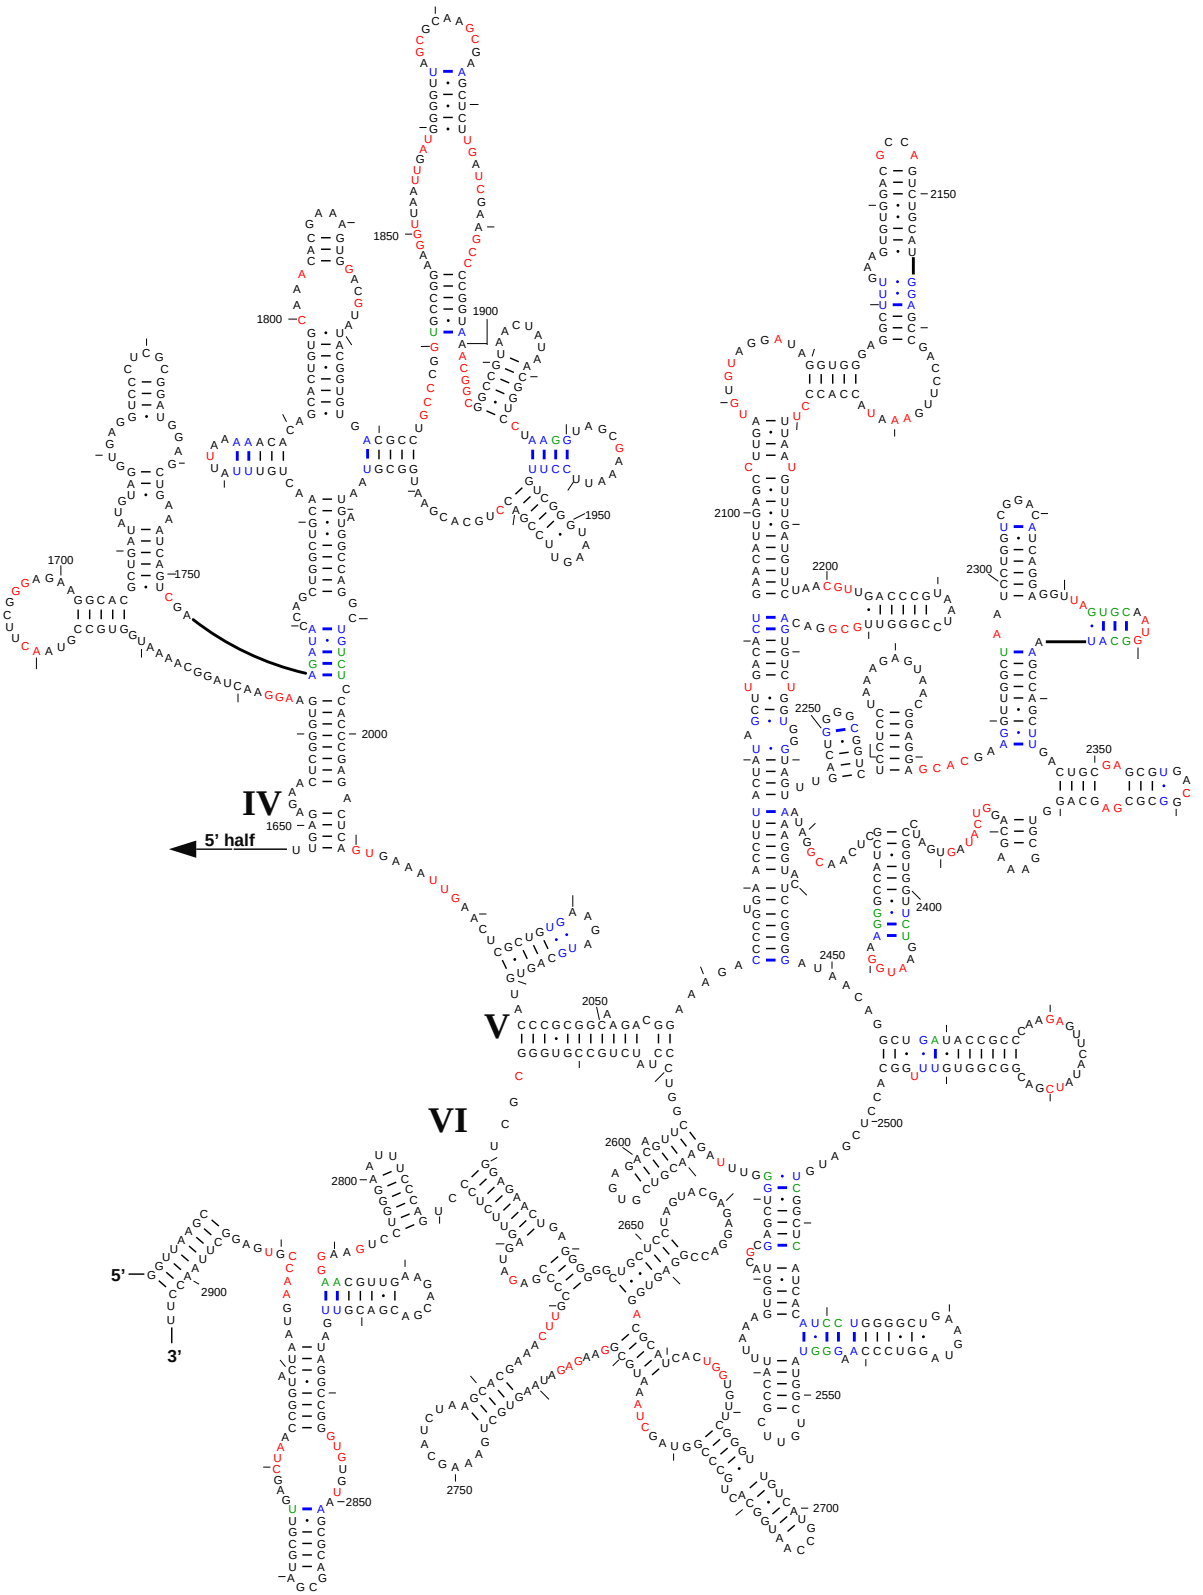
Secondary Structure: large subunit ribosomal RNA - 3' half



Escherichia coli

1981 Model (drawn in the Current Model Format)
(J01695)

Blue tick marks and nucleotides indicate base pairs present in the 1981 model but not in the current model.

Red nucleotides are unpaired in the 1981 model but are part of a base pair in the current model.

Green nucleotides are part of one base pair in the 1981 model but part of a different base pair in the current model.

Diagram Version: March 2002.
